Software Engineering graduate from Drury University with experience building full-stack applications using JavaScript, React, and PostgreSQL. Seeking a junior software engineering role where I can build scalable applications and grow as a developer.

EDUCATION

Drury University

Bachelor of Science in Computer Science: Software Engineering

Springfield, MO

August 2021 – May 2025

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, HTML5, CSS3

Frontend: React, React Native, Next.js, Bootstrap

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Supabase

Tools: Git, GitHub, Postman, Vite, npm, VS Code

PROJECTS

Full-Stack App for Church | *JavaScript, HTML5, CSS3, PostgreSQL* October 2025 – March 2025

- Developed a full-stack web application allowing administrators to manage website content and media
- Built RESTful backend APIs using Node.js and Express with PostgreSQL database
- Implemented secure authentication with JWT and bcrypt hashing for admin access control
- Deployed using Netlify serverless functions and Neon PostgreSQL cloud database
- Designed responsive UI for desktop and mobile users

Salon Scheduler App | *React, JavaScript, CSS3, Node.js and PostgreSQL* June 2025 – September 2025

- A full-stack web app for a salon business, featuring a responsive homepage, portfolio gallery, contact form, and appointment scheduler
- Implements client-server separation for security
- Utilize backend API calls to retrieve user appointment data, show openings, and request appointments
- Integrated Twilio API to send automated SMS appointment confirmations and reminders

Android Weather App | *React Native, JavaScript, MySQL* January 2023 – May 2023

- Built a zip code-based weather app using React Native and JavaScript
- Utilized a MySQL server to authenticate users via token with JWT encryption
- Utilized clear client-server architecture to enforce security

EXPERIENCE

Systems Intern

Community Foundation of the Ozarks

February 2025 – Present

Springfield, MO

- Reduced phishing susceptibility by 10% using KnowBe4 phishing simulation campaigns and targeted security awareness training
- Administer and maintain SharePoint Online infrastructure, creating and managing organizational sites and permissions
- Use the C-Suite system to run a variety of tasks, including admin roles, weekly audits, IT support for the software
- Provide technical support for enterprise hardware and software systems used in organizational meetings and events

Sales Manager

AutoZone

June 2023 – February 2025

Springfield, MO

- Lead a team of sales associates, providing guidance, coaching, and support to drive their performance and meet sales goals
- Demonstrated in-depth knowledge of AutoZone's products, services, and policies to assist customers with their automotive needs
- Resolved customer issues and concerns in a professional and timely manner, maintaining a high level of customer satisfaction
- Fostered a positive and collaborative work environment, boosting team morale and productivity
